Research

I am a postdoctoral research assistant in the Goal-Oriented Autonomous Long-Lived Systems (GOALS) Lab at the Oxford Robotics Institute, University of Oxford. My current research is focused on the robust continuous-time coordination of multi-robot systems under uncertainty. To achieve this, I apply planning, model checking, and task allocation techniques to continuous-time models of multi-robot behaviour.

- Multi-Robot Coordination
- Planning Under Uncertainty
- Formal Methods for Robotics
- Continuous-Time and Non-Stationary Planning Models
